

MEETING OF  
BUSINESSMEN'S

The next meeting of the Wetaaskiw Businessmen's association will be held on Friday evening of next week, August 26th, at eight o'clock, in the room at the rear of Christopher's Grocery. As it is the desire that every business and professional man and woman

There be a large representative meeting on this date. Let everyone do their little part and make Wetaskiwin a better place in which to live.

---

## WETASKIWINITES WIN RACES AT LAKE REGATTA

Owing to the stormy nature of the lake, the Gull Lake Aquatic sports were postponed from Wednesday of last week until Wednesday, August

The Children's Regatta was held on Thursday last, however, and was a great success. In the girls' swimming race Miss Dora Wallace won a prize, and in the boys' rowing race singles, Gordon Fraser came in first, winning the prize by a boat's length, even with the mishap of breaking his stretcher or foot rest, which caused him to fall off his seat and do an exhibition stunt of which no one doubts during the race.

were eight competitors, including boys from Edmonton, Calgary and Lacombe, and Gordon Fraser of Wetaskiwin also had the good fortune to finish the race ahead of the others.

It is to be hoped that some of the older boys of Wetaskiwin may be on hand on the 17th inst. to keep up the name and the fame that Wetaskiwin is getting at the lakes this year.

**FAREWELL TO REV.  
A. H. SCHWERMANN**

A very pleasant farewell party was given last Monday night by the young people of Zion's Lutheran church in honor of Rev. and Mrs. A. H. Schwermann. After several hours of entertainment a sumptuous repast was served by the young ladies whereupon a fine remembrance was presented to the departing pastor in recognition of faithful services rendered during the last five years.

from the effects of the pleasant shock the pastor and his family were again thrown into complete bewilderment on Tuesday evening when two members extended the invitation.

bers extended the invitation to join them in a dish of ice cream up town. Instead of driving to the ice cream parlor a sudden halt was made at the Parish Hall and the guests of honor led into the the building amid the greetings of the congregation which Rev. Schwermann is now leaving. Even a large number of the pastor's former members at Peace Hills and

Brightview had made their appearance to extend farewell wishes. The Rev. H. J. Elling of Brightview acted as toastmaster, assisted by the Rev. C. Janzow of Leduc. A very interest-

ing program of a humorous as well as of a solemn nature helped to alleviate the pains of parting. At a late hour a splendid lunch was served, calling forth many compliments for the persons who had prepared it. The presentation of handsome gifts gave expression to the cordial esteem in which the pastor and his family have been held. Heartfelt hand-claspings and well wishes concluded the memorable evening.

ed with the responsible position of organizing a new Lutheran College at Edmonton in which young men are to be prepared for the ministry. He will confer with his colleagues.

IN MEMORIAM

SWANSON--In loving memory of our dear husband and father, Alfred Swanson, who passed away on August 26th, 1918.

Three years have passed, our hearts still sore,  
As time rolls on we miss him more,  
A loving papa, true and kind

No friend like thee on earth we find.

## Don't Blame the Policeman

If you have dandruff and falling hair, itchy scalp, or if your hair is not growing as it should, nobody but yourself is responsible. The remedy is as near to you as your phone.

"JUSS" (Harrison's special hair tonic and dandruff eradicator) is now for sale at all the local drug stores. "Just rub in a little 'JUSS'."

"JUSS" has been before the Calgary police for two years but has just recently been placed in all the drug stores in the province. It is not "hot stuff" but made by two druggists with a combined experience of over seventy-five years. It took ten years of laboratory and analytical tests to perfect the formula.

OUR GUARANTEE—Purchase a bottle of any drug store (a full month's treatment) use the contents according to directions and if you do not get results that will amaze you, if it doesn't kill the dandruff, stop the falling hair, etc., return the empty bottle to the druggist from whom you purchased it and he will refund the purchase price without a question. We back up the druggist.

"JUSS" is a delightfully perfumed clear amber spirit solution, no sediment, oil or grease, a real pleasure to use. Thousands of unsolicited testimonials are on our files from every point in Canada.

Don't think you owe it to yourself to give this remarkable preparation a trial? It is as different to all other hair tonics as day is to night.

## LORD AND LADY BYNG GIVEN FINE WELCOME AT QUEBEC

Quebec, Aug. 11.—With the air vibrating from the firing of guns from Quebec's ancient citadel, the sound of whistles from river craft, the ringing of bells and the applause of a large crowd, Lord Byng of Vimy, Canada's new governor general, landed this morning at King's Wharf, proceeded through the streets to the provincial legislative buildings and was there sworn into office with a pomp and impressiveness which probably have never before been equaled in the history of the dominion. After having spent the night on the Empress of France, the liner which conveyed him from Liverpool, his excellency this morning received Prime Minister Arthur Meighen, who went on board to pay his respects.

A band played the national anthem as his excellency came ashore. The governor-general, who wore a general's uniform, stood smartly at the salute while it was being played, and afterwards inspected the guard of honor on the wharf.

Behind an escort of cavalry, the governor-general and Lady Byng, their staff proceeded in carriages by a roundabout way to the parliament buildings. Lord and Lady Byng received a series of ovations as they passed through the crowds, which his lordship acknowledged by waving his hand while his wife bowed repeatedly.

A dense throng had gathered at the parliament buildings, and here again he received an ovation. In the meantime those present on duty by virtue of their official position and those by invitation had gathered in the legislative council chamber, where the ceremony of swearing in was to take place. The scene was one of considerable brilliancy. His excellency and Lady Byng entered the chamber preceded by representatives of the militia, air force and navy, the lieutenant governor of the province, and aides-de-camp to the governor-general. After the governor general had taken his stand on a dais, Mrs. Meighen presented Lady Byng with a bouquet of white roses.

Lord Byng's commission as governor general was then read by his military secretary, Captain G. P. Balfour, his excellency immediately afterward taking the oath of allegiance to the king and swearing in "well and truly" exercises his office as governor general and subscribing his name in the book.

He was then handed the Great Seal of Canada by Sir Henry Dufferin, minister of finance, which, according to custom, he handed back to Thomas Mulvey, under-secretary of state, for safe keeping. The proclamation of the governor general's swearing in, ordering the government of the dominion to continue, was read and after his excellency had signed it was sealed with his privy seal. The ceremony ended with the playing of the national anthem by the band in attendance.

The installation ceremonies completed a salute of its guns from the citadel shook the building.

## MISSIONARY'S BRIDE TRAVELS LONG WAY

Edmonton, August 16.—News has reached the city of the first white marriage ever performed in the Canadian Arctic coast. The bride, now the wife of Rev. G. E. Merritt, the Anglican missionary at Coronation Gulf, undertook the journey of 2,500 miles by land and water to that point this spring, and is the first white woman ever seen there. She travelled north this spring as far as Shiglic Point, at the mouth of Maclean River, on the Arctic coast, where she was met by Rev. Mr. Geddes. The two proceeded by steamer to Bannock Burner where her marriage to Mr. Merritt took place. The population around the shores of Coronation Gulf is practically all Eskimos with a few Indians.

## BOILS AND PIMPLES ON FACE AND BODY.

Boils and pimples are caused by bad blood, and there is only one way to get rid of them and that is to get at the seat of the trouble by using a good reliable blood cleansing medicine such as Burdock Blood Bitters.

This preparation has been on the market for over 40 years, and is the most reliable remedy for all troubles arising from a bad condition of the blood. It removes all impurities from the system, and will leave a clear, healthy skin devoid of all eruptions.

Mr. Felix Bechler, 39 Dover St., Chatham, Ont., writes:—"I was troubled with boils and pimples, and could not get rid of them. I used Burdock Blood Bitters, and finally I was free of them. I was so relieved, I used it on my neck, back and hips, and the pimples also disappeared."

Price, \$1.25 a bottle; put up only by The T. Millard Co., Limited, Toronto, Ont.

## HERBERT GREENFIELD SUCCEEDS CHARLES STEWART AS PREMIER

Friday afternoon last, Premier-elect Greenfield announced that Herbert Greenfield, Lieutenant Governor first had officially called upon him to form a government in succession to that headed by Mr. Honor. Charles Stewart.

The personnel of the cabinet chosen by Mr. Greenfield is:

Herbert Greenfield, premier, provincial treasurer and provincial secretary.

John Edward Browner, attorney-general.

George Hoadley, minister of agriculture.

Richard Gavin Reid, minister of municipalities and health.

Ferris Earle Baker, minister of education.

Vernon Winfield Smith, minister of railways and telephones.

May Irene Parby, minister without portfolio.

It was explained by Premier-elect Greenfield that it was not his intention to permanently hold the portfolios of provincial treasurer and provincial secretary, but in view of the importance of these offices and the fact that he wished to carefully consider certain plans which, if adopted, might have an important and far-reaching effect on the organization of these departments, he did not think it advisable to make appointments at the present time.

The premier designated stated that he had extended an invitation to Alex Ross of Calgary to accept the portfolio of minister of public works, and that he was awaiting the acceptance of Mr. Ross of this position.

The Alberta cabinet was sworn into office Saturday and the first cabinet meeting of the new executive conducted Saturday afternoon.

Premier Greenfield said, Friday night he had nothing to say to the people of this province at this time. He considered the U.P.A. conference to have been entirely satisfactory from both the farmers and citizens' standpoint, and to use his own words he was availing the opportunity to be given a chance to commence his work.

He would not discuss the question as to the possibilities of his own resignation to a governmental post, "if I am leaving this of the good judgment and to the sense of the people. I am not worrying a bit and it is entirely up to them."

## HOPE TO INCREASE GROWING OF RYE ON THE PRAIRIES

Regina, Aug. 17.—Methods for improving farming conditions for the settlers now on the land in Western Canada were discussed at a meeting of the directors of the Western Canadian Colonization Association in Regina on Friday. The report of the investigating committee which inquired into drought conditions of Southern Alberta and Southwestern Saskatchewan, and which urged the extensive growing of rye as a partial solution of the problem was reviewed, and the recommendation of the committee was endorsed strongly. M. A. Brown, vice president of the association, was empowered to organize an extensive campaign for rye seedling in the areas covered by the report. It was reported that slightly in advance of 300,000 acres were sown to rye in Alberta and Saskatchewan in 1920; and it was hoped to increase this acreage to 1,500,000 by the proposed campaign. It was believed that the average production of rye in the dry sections during dry years would exceed wheat production by 50 to 100 per cent. Efforts are being made by the association to induce banks, mortgage and loan companies and the governments to supply the necessary seed and meeting of farmers will be organized at which the merits of rye growing will be explained.

## ALYMER, QUEBEC, IS DESTROYED BY FIRE

Fire of a lightning character, fanned by a strong wind from the south-west, swept Alymer, Que., on Friday afternoon and left it a blackened ruin. The town, which was formerly a quiet and picturesque city, at least one death was caused by fire, 700 persons were rendered homeless and the property loss is estimated by Mayor Nash, of Alymer, at \$750,000. Most of the principal buildings of the town were razed by the flames and the houses of 325 families were lost.

The fire began with dramatic suddenness, leaping from dwelling to dwelling, urged on by the stiff breeze that came from across Lake Beauport, and within five minutes had laid waste to the town. The flames carried everything before them and as each gust of wind blew fresh flames burst forth

## FEARED SHE HAD HEART TROUBLE

WINNIPEG WOMAN FELT SHE WOULD SMOOTHER AT TIMES HEALTH RESTORED BY TANLAC

"I was told no medicine in the world could help me, but Tanlac did what seemed to be impossible and I am feeling better than I have in many years," said Mrs. Walter J. Crowder, of 645 Rosedale Ave., Winnipeg, Man.

"About a year ago my health broke down completely and I had to take 'X'—I had a regular sledge of it and only after many weeks was I able even to do as much as sit up. Nothing I took gave me any strength and I just wasted away."

"I ate barely enough to keep alive, and what little I did eat caused great distress from acid stomach. Sometimes I felt like I would smother, and my heart would palpitate so I was afraid I had heart trouble. My husband spared no money in providing me with the best of treatments, but nothing benefited me, and, as I said, I was told my case was beyond the reach of any medicine."

"Major Park's statement about what Tanlac did for him convinced me that there might be a chance for me, so I gave it a trial. It was simply marvellous the way this medicine brought back my health and restored all my troubles. I feel like a different woman, eat anything without fear of discomfort afterwards and I have gained ten pounds in weight. It is simply wonderful that a medicine could do so much good. My life is no more like what it was a bright sunny day. It is like a dark rainy one. I am a well and happy woman and it's all due to this grand medicine."

And soon the heart of Alymer was a seething furnace.

An idea of the fury of the fire can be gauged from the fact that two farms, respectively two and three miles from the place of origin of the fire were burnt and that the woods and bush five and a half miles away from the town were scorched. The trees were razed and the whole countryside for miles seared by the heat of the flames.

## For Farm Improvements

Are you in need of financial assistance to buy seed or to increase your tillage, your stock or equipment? The progressive farmer will find this Bank ever ready to extend reasonable loans for legitimate purposes. Discuss your plans with our local manager. You will find him interested.

## A Gigantic Libation

To spill into the Atlantic \$54,000,000 worth of liquor, seized by the dry authorities and the New York Police in recent raids, is announced as a special feature of the vigorous prohibition campaign, to be expected at an early date.

How the ancients, who were given to pouring out libations to their heaven gods, would turn in their graves if they could hear of such a spectacle! The vets will do doubt shudder at the very thought of the waste of so much liquor; but the sacrifice will have the moral value of averting drunkenness, crime and demoralization, and of upholding the majesty of the law.

## Provincial Police.

The Royal North West Mounted Police formed the most famous and successful police organization of its type in the world. Indeed, it may be said that that force originated the type and set a standard of efficiency which has been the ambition of other mounted forces of the world ever to follow and equal. The mounted State forces of New York and Connecticut were modeled after the Canadian Mounted, and recently when the State of Illinois established a mounted constabulary it was frankly said that the State legislators had the R.N.W.M.P. should be copied as closely as possible.

The Alberta Provincial Police, in the method of its organization and latterly in its effectiveness, follows closely in the style of its mounted predecessor in this province. It has been in existence for only four years and at the beginning, owing to the war, it was unable to secure the best class of men for police work but it is now manned practically throughout by former "mounties," who are carrying on the noble traditions of the parent body.

Its record of activities for the past year is highly creditable and it is proving that with the confidence and support of the public, to which it is fully entitled, it is succeeding in enforcing the law quite as capably as the famous organization which formerly maintained order in these parts—Calgary Herald.

## There is No Dividing Line.

"That 'no man can live unto himself' was perhaps never so much realized as it is today. To the whole world is seeking to derive some way of eliminating the social and life-threatening Nations, organizations, and individuals have come to the point where they see that only upon the broad foundation of mutual understanding and tolerance can prosperity be built.

The League of Nations is a case in point. It is perhaps the most vital question before the world today; its object being not only to preserve the peace of the world but also to smooth out the difficulties that stand in the way of progress.

Even those ancient enemies, capital and labor, after generations of fighting, have, in most cases, taken a seat at the same board and are discussing their mutual problems, each with an eye to the viewpoint of the other.

Business men are getting together; they are working less for themselves and more for the community. They have realized that in unity lies their strength.

Nations and people are tired of war. They are heartily weary of divisions and sectionalism. The average man or woman wants to be free to go about his or her business in peace.

People are weary of cuts and taxes which lead to trouble. The "brain trust" wants a change in the leadership and resentances and start anew, but unfortunately reactionary self-seeking fanatics still persist in their efforts to set nations against nation and race against race.

Even in this country we have occasional attempts to draw a dividing line between the sections of the country, and another at a time when all men should unite to weld Canada into the mighty nation she is destined to be.

Any one, whether an organization or an individual, who attempts to capitalize such prejudices by stirring up

racial animosity by any means whatsoever, is a distinct menace to the well being and dignity of the country and should be regarded and treated as such.

There is no imaginary dividing line between one part of the Dominion and another. There is no difference between the people of one section and another; there never was such a line and there never will be such a difference.

We are either Canadians, no matter in what province we live, or we are enemies to Canada's progress and those who do not stand for one united, indivisible Canadian nation from the Atlantic to the Pacific do not stand for Canadianism and through their own selfish egoism have lost sight of the real need and desire of the country—Commercial.

## TRADE PROSPECTS FOR CANADA NOT BRIGHT

An early change from the existing state of depression cannot be expected. In view of the slow though sure pace at which an adjustment is taking place in other countries. The most noticeable feature, so far as foreign trade is concerned, is the almost universal determination to seek prosperity and solvency by maintaining restrictions upon imports. European countries, with the exception of the United Kingdom, show no signs of relaxing the stringent regulations already in force, and a similar attitude is manifested on this continent. The United States has under consideration a revision of the tariff which will include the provisions of the temporary measures now in force, and will affect a wider list of articles in which Canadian exporters are interested.

Canada is fortunate in having so large a proportion of her exportable surplus in the form of essential foods, for which the demand will be stimulated by the revival of industrial activity in those countries which prohibit, either absolutely or by article, the importation of manufactured goods. The tariff imposed by the United States against so many Canadian food products will merely divert the latter to other markets. Germany and other important European consumers are seeking credits for the purchase not only of foodstuffs but of raw materials. They must have both in steadily increasing quantities, as their people become more regularly employed in increasing orders obtained by underbidding competitors. On the basis of the current scale of wages in Germany and on this continent, and at the present rate of exchange, the equivalent of labor costing \$10 in Canada or the United States costs in Germany only \$5. Such disparity in labor costs can only mean that the outlook for export trade in the articles of domestic manufacture in the cost of which labor is the main item is not encouraging. The phase of the inevitable adjustment is, however, of a passing character, for as industries revive in continental Europe the needs of the population will expand. Moreover, as the basis of all is an exchange of commodities, these nations will sooner or later have to accept the products of other countries in order to dispose of their own manufactured articles. The economic war concerned will continue to govern despite the superabundance of tariffs and restrictions. Regarding this phase of trade conditions in Europe, in which Canada is now more interested as a leader of the restrictive features of the United States tariff, a notable group of British financial leaders, including the heads of all the large London banks, have issued the following significant pronouncement:

"Trade is exchange. No nation which lives by trading with others can prosper unless other nations prosper too. We hold today great stocks of goods. We are ready to manufacture more. There is a large and insistent demand for them abroad. But owing to the paralysis of Continental commerce—due in part to the restrictive barriers which the new states have set up between themselves—the wealthy buyers of our goods have not the means to pay for what they want. We have to build up the market that we need by encouraging Continental nations to export to us. For it is only by exports that they can recoup their credit and provide funds for the payment of their debts. In the meantime we believe that the experts to control and hamper imports into this country, whether by licenses, tariffs, or any other means, can only retard progress in the Continental recovery of trade. Legislation of this nature, while it may increase the profits of a few isolated industries, cannot fail to check our output as a whole, and to increase the costs of production to a level which makes it increasingly difficult for British traders to compete successfully with others in the markets of the world."—Bank Commercial Letter.

## EXAMINER'S REVIEW OF THE MARKETS

**CATTLE**—Prices at Edmonton on the good steers are holding up, owing to export buying, and top prices are \$25 and \$26; good butchers, \$15.00 and \$16; medium, \$12.50 and \$14.50; common \$2 and \$3.50. Choice cows, \$14 and \$15; good, \$12 and \$14; medium, \$10 and \$12; and \$2.50. Butcher steers, \$12 and \$13; stockers, \$2 and \$3; demand is poor on this class and too many have been shipped in which could be finished to advantage; looks like a buyer's market on this class; stock holders, \$2 and \$2.50; stock cows, \$1.50 and \$2.50.

**HOGS**—Prices at Calgary have been easing off since last week, with the sales on Thursday at \$14. Owing to shortage on overweight hogs, producers should watch weights carefully and observe new cuts as given in the Examiner. Hogs have been holding fairly steady at Edmonton with Thursday sales at \$14.

**SHEEP**—Fleece sheep have been selling at Edmonton, and prices are slightly lower, with wethers at \$8 and \$8.50; ewes, \$2 and \$3; lambs, \$1.50 and \$1.75. **CHICKENS**—Wide swings shown in the market, but underlying tone of market strong, according to all estimates of yield and world requirement. Other grades hold fairly firm. The market in Alberta stands in several places and will be general very soon. In the north-central and northern districts warm weather is now required. Fall damage reports continue to show very material losses in some districts.

**PRODUCES**—Eggs are firm in the 26-cent district with quotations this week \$1.75 and \$2.00. Spring chickens are lower than a week ago owing to fairly generous receipts; now quoted 22c; fresh, 24c and 25c. Dairy butter moderate demand and dealers paying around 20c on straight receipts. No changes reported in creamery butter or cream prices, the creameries paying 24c, 26c and 28c for special, first and second grades, with stations 1c lower. Creamery butter moving satisfactorily, with the coast taking fair quantity.

**HAY**—Movement slow; dealers paying \$14 and \$15 at country points; timothy not offered extensively yet, but probably open around \$25.

## The Quiet Ones

Some people quietly proceed, and take no part in fuss or brawl; they do their stunts with grace and speed, and make no racket as they toil. Retiring poets, they are not sharks for any pomp or circumstance; they do not rise to make remarks whenever they see half a chance. They do not ask us for our votes and argue in the busy markets, and if perchance they lose their goods they bear their sorrow in their hearts. And in this world of endless noise, where human flippers rant and roar, we learn to love the quiet boys who usually do the useful chores. They jog along their even groove, and draw good pay and earn it all; and read classic volumes to improve their minds, while we rushing shadows fly. They will be on time, as sure as fate, on time for work when morning comes; they'll have no stories to relate of high adventure in the slums. All through the years they work, serene, those quiet, self-sufficient lads; and this old world is worse, I mean, when they are gone than when they are here. Oh, those times of blatant sounds, of strident boast and loud bragging; the men who make the whirring go round are not the fizzes and fireworks gang—Walt Mason.

Unofficial estimates by the authors of the Purdney tariff act, are that it will yield \$740,000,000 a year to the U. S. treasury.

## MILBURN'S

gently unlock the secretions, clear away all effluvia and waste matter from the system, and give tone and vitality to the whole individual. Indigestion, constipation, sick headaches, biliousness, coated tongue, foul breath, heartburn and all other troubles arising from a wrong action of the liver.

## BEST FOR LIVER.

Mrs. D. Cartwright, 89 Clinton St., Hamilton, Ont., writes:—"I cannot speak of the whole individual, but I can speak of the liver. I have had the best possible results from the use of Milburn's Liver-Liver Pills. A visit at all doctors or medical men resulted in nothing of use by The T. J. Millburn Co., Limited, Toronto, Ont."

## ALBERTA POTATO CROP THE BEST IN THE DOMINION

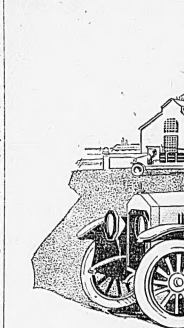

The Alberta potato crop will probably be the largest in proportion to the acreage planted of any province in the Dominion according to the August reports on fruit and vegetables issued at Ottawa and just received by A. Grant, market commissioner for British Columbia in this city. Alberta leads all the provinces with a probable yield of 80 per cent of the total acreage planted, which has been estimated at 43,800. British Columbia and Manitoba come next with a probable average of 75 per cent of the total acreage. Conditions in the eastern provinces, according to the report are very bad, the probable yield in Quebec and Ontario having been gauged at about 50 per cent. For this reason it is expected that a large part of the potato crop in the province will be shipped to these districts.

The fields around Edmonton are in especially fine shape, according to Mr. Grant, who returned Tuesday from a ten days' trip to Winnipeg, Regina, Saskatoon and Edmonton. He states that the newly formed Potato Growers' association expect to handle about 700 acres of graded potatoes this year and this amount represents about one-third of the tillage grown in that district. In his opinion the potatoes have never looked better and if the frost is sufficiently delayed he predicts a bumper crop in the district within a twenty-mile radius of Edmonton. This same district produced a good crop last year, but he expressed the belief that this year's yield would be even better. The fields which he observed further south were in not nearly as fine condition.

Wholesalers in western Ontario are at present quoting 30-cent sacks of potatoes at \$3.00 while in Calgary 100-pound sacks are selling for from between \$2.00 to \$2.75. These now on the market are mostly from British Columbia. When the local supply comes on the market the price will probably be considerably less.

Mr. Grant said that in no case would there be an oversupply of potatoes, for the same conditions that are found in eastern Canada are prevailing in the States. Prices in the west, however, he said, would not be very much higher than last year, although a slight increase might be noticed.

Canada has twenty-two universities and forty-five colleges. In addition there are 30,000 elementary schools, with 22,000 teachers, and an enrolment of nearly 1,500,000 pupils. Lord Burcham, chairman of the Imperial Press Conference, said: "Canada's achievement in its institutions of learning is one of the most striking features of Canadian life."

## You Save Every Way—

Quality maintains economy. No matter how much you pay "per gallon" for other lubricating oils you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

WE GIVE IMPERIAL Polarine MOTOR OILS GRANT CASE SERVICE

## Children's Savings Account

It is a pleasure—not a trouble—to open Savings Accounts in the names of your children. Even if you intend to deposit but a dollar at a time in each account, we welcome this business because it is an education in thrift, and we are glad to assist you in teaching your children to save. \$1. opens a Savings Account. Deposits of \$1. and upwards are welcomed.

# NO MYSTERY ABOUT HIS REFUSAL SAYS PRESIDENT H. WOOD

Winnipeg, Aug. 16.—H. W. Wood, president of the United Farmers of

Alberta, and Col. John Fraser, director of the Farmers' Sun of Toronto, arrived in Winnipeg recently to be present at what is expected to be the winning up meeting of the Canadian wheat board.

Mr. Wood stated that there is no mystery to his inability to accept the presidency of Alberta. He said he had declined the honor because he believed he could give greater service by confining his energies to the organization of which he is the executive head. He wished it thoroughly understood, he added, that he would lend no direction whatever politically to the new government of the province and would not be associated in any way with the Greenfield administration.

Mr. Wood expressed the opinion that the people of Alberta need have no fear for the outcome of the new administration.

Shipments of Alberta horses are being made to Trinidad.

## NOTICE

### TAX SALE OF LOTS IN MILLET

Sale of Lands in the Village of Millet For Arrears of Taxes

Notice is hereby given that certain lands in the Village of Millet, as described:

Plan No. XV.  
Lot 1 & 13, Block 2;  
Lot 5 & 13, Block 2.  
Lot 14, Block 2.

will be offered for sale for arrears of taxes and costs on the Twelfth day of November, at 3 p.m. on the premises of the said lots, weather permitting.

This sale will be advertised in the Wetaskiwin Times and also in the Alberta Gazette.

Dated at Millet, the Thirteenth day of August, A.D. 1921.  
Notice—Important. Unless the arrears of taxes and costs be sooner paid the said lots, weather permitting, will be offered for sale at the time and place mentioned in the advertisement.

I. N. HUGHSON  
Secy-Treas.

22-Nov. 3.

## MILLET

Millet, Aug. 16.—The DeStor brothers are unloading a car of brick to be used in the building of their new home.

Great interest is being taken since it has been decided to drill for oil in the Millet district. It has been a well known fact that there has been oil in this vicinity, as large deposits of tar sands have been known to exist 17 miles west of Millet. It is in the neighborhood of these sands that the drilling will take place. Many people can tell you the exact quarter, and if they are all right there will be a plentiful supply of derricks. There is one thing sure, to get to the oil fields you will have to take your ticket to Millet or Wetaskiwin and then go west.

H. T. Harris and Fred Pinyon spent the day at Edmonton on Monday.

Harry Stuart, the enterprising secretary of the Agricultural Society is very busy these days working on the forthcoming fair. The fair this year will no doubt pass all previous ones as to exhibits. Entries are coming in every day, Fair Day September 1st.

Pigeon Lake is getting a large share of holiday makers this year. People are now coming from all parts to see Pigeon Lake in its autumnal attire.

Millet's first tax sale will take place on November 12th, when two lots will be offered if not previously redeemed.

The provincial sanitary inspector paid Millet a visit last Friday, and now everyone is busy cleaning up.

Herman Koenen, M.D. and Mrs. Frysto Mr. and Mrs. Holt and party, were at the lake on Sunday.

School starts September 6th.

A. H. Parker shipped a car of hops to Edmonton on Friday.

Mr. Kennedy of Edmonton paid a visit to Millet.

The demand has been very great for the fair price hats. There are a few more left and some can be obtained from the secretary.

Miss Constance Cottrell is an Edmonton visitor for a few days.

A. J. Phoeby returned to her home in Edmonton last Thursday after spending a number of weeks with Mr. and Mrs. Cottrell.

Mr. H. Phoeby and friends motored down from Edmonton to Millet last Sunday and after spending a short time with Mr. and Mrs. Cottrell motored on to Banff.

## ROBT. ELDER

One of the oldest settlers and pioneers passed away after a comparatively short age of suffering in the person of Robert Elder, at the age of seventy four years, who was very widely known throughout the Millet district.

The deceased was born at Sharnville, Quebec, and came west twenty years ago with his family, settling at Millet long before it became a village. His wife predeceased him a little over two years. Both were very ardent and conscientious Christian parents, and leave a strong heritage of a strong and sterling character and noble influence to their children and friends.

Mr. Elder was first taken seriously ill about two months ago at Canmore, and was taken to the hospital there. Finding very little relief he returned to the home of his son Thomas, where he had been making his home, and where, in the midst of his family, he quietly entered into his heavenly home, where he had during the closing weeks, been yearning to go.

He leaves behind to mourn his demise, Robert and William of Millet; Mrs. Elizabeth Telford of Kingsman; John of Patience, and Mrs. Rand War of Wetaskiwin.

A brief service was held at the late residence and the funeral procession was taken to Millet where a very large audience gathered in Playon's hall, to pay their last respects to a kind friend and true neighbor.

Rev. I. N. Hughson conducted the services and was ably assisted by Miss D. Atkins, who sang very prettily and impressively, "One by One". The members of the bereaved family all join in heartfelt thanks for the manifest sympathy and help in their deep sorrow.

## Inside Information

He was a physician, kindly and loved by all patients. No night was ever too cold for him to get out of bed and drive to the sickbed of a sick man. The whole community loved and trusted him. Many arose every day to eulm him. But one day there came a rift in the late, a note of discord in the general song of his praise. A woman became very ill. A kindly neighbor inquired of her little girl about her mother's health. "She's going to die," said the little girl suddenly. "How do you know?" asked the neighbor. "The dogged old doctor says so," replied the child, "and I guess he's right—he knows what he gave her."

What does your Label say?

W. E. Elliott, Pastor

ANOTHER BUNCH OF  
CATTLE RUSTLERS  
CONFESS TO THEFTS

Another gang of cattle thieves have been brought to justice by the Alberta Provincial Police. Early in the summer, complaints were received by the police of the loss of several head of cattle in the vicinity of Castor. In June, a carload of cattle was shipped from Castor, a well-known rancher in the district was traced by Constable Curry, who found that fifteen head had been sold at Moose Jaw stock yards by Fred Morgan, a well-known rancher in the Castor district. These were identified as cattle that had been stolen in the neighborhood of Fleet and Castor.

Morgan was arrested and shipped to Red Deer where he confessed to the theft of the cattle and implicated his brother-in-law, Fred Carter, and two other ranchers, Huns Jackson and Shirley Brown, in the transaction. All these men were arrested and brought home. Carter subsequently confessed to Inspector Fisher of the A.P.P., and Crown Prosecutor Quigg. Carter confessed Morgan's story of Jenson and his brother-in-law, Fred Carter, was being formed, with Sir Edward Morris, premier of Newfoundland, as chairman. This was the word recently received by the mayor of Calgary, in a letter written to him by J. Handley Yates who has just returned from England, where he lectured before the Royal Colonial Institute on "Canadian Natural Resources" and pleaded for their development. In his communication to the mayor, Mr. Yates said:

"This syndicate proposes to acquire a controlling interest in the big quarrying property of Herbert Alexander, who is unquestionably the greatest living expert on quarrying in the world, and in spite of the fact that the syndicate is in a practical way, now very profitable the process is, from our expectations are fully realized, and I am sure they will be, we shall form a company with a large capital to develop the property on a much larger scale."

## THE NATIONAL GAME

Wherever you find a good ball team you will find the people gathering for one of the most healthful pursuits in which man ever engaged. There is something about the game that is physical and mental tonic.

Some people feel that the players are the only ones who get physical benefit. Yet the cheering crowd gets a healthful stimulus from the mere yelling and consequent expansion of the lungs. The sentiment of jollity and good cheer helps people to forget their troubles. It sends them out with better courage. A lot of people who gulp down bitter medicines, would do better to take time off and go to the ball games.

Furthermore, whenever you have a good team, visitors come in from miles around, and the game is the life of the business centre and trading point. Good baseball is one of the best commercial assets that a community can have. When conducted on a high plane of sportsmanship and fair play, as most ball games are now, the sport sets an example of manliness and self control to all young men.—Ex.

ALBERTA MIGHT  
HAVE PROFITABLE  
CHILLED MARKET  
IN ENGLAND

An Alberta steer, weighing 1,200 lbs shipped live weight to Montreal, and shipped by chilled storage to the English market, and disposed there, with its transportation \$58.97, and will yield \$137.30.

This is some of the information contained in the report of John Wilson, vice-president of the Alberta Cattle Traders' association, and William Spurrell, chairman of the chilled meat commission of the U.P.A., the commission appointed by Hon. Duncan Marshall to make an investigation of the livestock market in Britain. The report is exhaustive, illuminating and very valuable.

"But the fact" the report adds "is there is no chilled meat on the market at the present time, and that as soon as some Canadian arrived it was snapped up at an advanced price over the South American article. When North American chilled meat was being delivered in that market, the difference between average home killed and the chilled meat was 1.12 p.c. of the price of the home production. English beef or cow meat cost at best at \$12.75 per cwt. and would mean, if the same rate held for our better quality, a price of \$29.04, instead of \$19.65."

## NEWSPAPER'S VALUE

Mr. Robert Blackford, of England, has been counting up how many words he gets in a newspaper for a penny, and how many for the same sum in an average novel. He makes it \$2,000 in the newspaper and \$25 in the novel. You get only one story in the novel, whereas in the paper you get scores of interesting articles or paragraphs about real events and living men and women. You also get literary articles by well known writers or public men on topical subjects. Moreover, any of the articles and sketches in the newspaper are better written than in any fiction except the best. Mr. Blackford expresses surprise that people who will give serious and sincere perusal to a novel will grumble at threepence for a first rate newspaper.—Christian Science Monitor.

For the purpose of developing Alberta coal, a plan has been laid before some powerful groups of financial interests in England, and a syndicate is now being formed, with Sir Edward Morris, premier of Newfoundland, as chairman. This was the word recently received by the mayor of Calgary, in a letter written to him by J. Handley Yates who has just returned from England, where he lectured before the Royal Colonial Institute on "Canadian Natural Resources" and pleaded for their development. In his communication to the mayor, Mr. Yates said:

"This syndicate proposes to acquire a controlling interest in the big quarrying property of Herbert Alexander, who is unquestionably the greatest living expert on quarrying in the world, and in spite of the fact that the syndicate is in a practical way, now very profitable the process is, from our expectations are fully realized, and I am sure they will be, we shall form a company with a large capital to develop the property on a much larger scale."

MR. STEWART'S  
PARTING WORD

His Honor Charles Stewart, immediately before the resignation of his

office, bequeathed the following statement to the people:

"After about twelve years of public service, it is not without some measure of regret that one lays down the responsibilities of office. There are, however, some regrets as well and my particular one is that in the recent election so many of the men who were not only my colleagues and supporters in the last legislative assembly, but many of whom for several years had rendered exceptional public services, had the misfortune to be defeated. Upon their records as public men and members of the legislature, I feel quite sure they were entitled to more consideration at the hands of the electorate."

"A retrospect of the last few years of public affairs in Alberta reflects a good deal of credit upon the legislature in general, and I want to express my hearty and sincere thanks not only for the support of the measure which was regarded as the promise of improvement of the laws and conditions in Alberta."

"As a farmer in Alberta, I feel quite safe in saying that agriculture, the predominant industry in this province, has not been neglected from any standpoint whatever, and I have some pride in the fact that this province has been in the van of all the provinces in Canada in progressive legislation and aggressive measures for the development of the agricultural resources of Alberta and the improvement of the conditions on the farm."

"I recognize the fact that the powers of a legislative assembly are considerably restricted and that many matters that have affected agriculture adversely have been beyond our powers to remedy, but Alberta has not only taken care of the education end of agriculture, which is the particular function of a provincial government, but we have gone a long way in matters of direct assistance during the trying period of the last few years."

"In every phase of our public administration we have endeavored to keep abreast of the times and in many things we have tried to lead, and in spite of the fact that the service of this kind requires large expenditures, we have been able to maintain the credit of the province at a very high standard, and in the bond market today no province in Canada has a better standing than the province of Alberta."

"There are two forces which play a large part in the success of governments. One is the legislative assembly and the other is public opinion, which, as it is expressed, from time to time, in an important way, the initiative and carrying out of public policies."

"I wish to express, as I said before, not only my satisfaction at the general support which has been received in the legislative assembly of this province, but also to express my very highest appreciation of the kind and friendly opinion as to the time to time looked and supported the efforts of the government of the province, and even though the results in the general election brought about a defeat of the government, there

will still be lacking any serious criticism, and I wish to very earnestly beseech for my successor in office and his colleagues the same measure of support and backing from the legislative assembly and the people of the province of Alberta that I am to very gratefully acknowledge."

To launch a scheme for planting a greater area of rye with a view to giving the drought problem in south Alberta and southwestern Saskatchewan a solution was given at Wetaskiwin on Friday by the board of directors of the Rotary Credit Men's Association, the Rotary and Kiwanis clubs and the Canadian manufacturers.

ROAD BUILDING  
PROBLEM IN FAIR  
WAY TO BE SOLVED

That Alberta's road building problem is in a fair way of being solved, resulting in economical and efficient roads all over the province, and that "hundreds" a hard, almost standard substance, found nearly all over Alberta, which is held to be responsible for the state of Alberta roads after rain, and which at present is thought of only in connection with roads enlarged in mud, will yet make its place among the valuable assets of Alberta, is the statement of Hon. J. L. Cote, provincial secretary, and chairman of the scientific and research council of Alberta.

The statement of Mr. Cote is based on the reports of Dr. K. A. Clarke, engaged at the University of Alberta, under the construction of the road study, in a program which embraced the study of road materials in the province, and the securing of necessary information about the properties of material available in Alberta for road building, so that methods of construction can be devised for providing highways that will be economical and efficiently serve the transportation needs of the province.

As far back as 1919 Mr. Cote started the machinery of the research which the Industrial Research Commission, of which he was appointed the chairman, and one of the first objects laid down for the research was to make the investigation of the famous Athabasca tar sands at McMurray. The objects aimed at were threefold. First, with a view to determining the bitumen content in the sand; secondly, by the finding of a binder which could be used for the slack sands of the province, and thirdly, for determining the suitability of utilizing this tar sand, mixed with the ordinary clay and soils of the province, in making economical, and at the same time, efficient roads. Dr. K. A. Clarke with a wide knowledge and experience in this work, was engaged by the commission, and his latest reports are to the effect that material highways has been made in this matter.

"We have every hope of ultimate success in the effort to give cheap and serviceable roads to this province," said Mr. Cote. "The experimental work is going on, but from Dr. Clarke's report, I can safely say that he has met with some measure of success, and that the research department has succeeded in a laboratory way, in preparing a series of experiments with bituminous materials, which encourage the hope that it will be possible to devise an economical road road which will be much more serviceable than the sort which we now have to use."

Still has been lacking any serious criticism, and I wish to very earnestly beseech for my successor in office and his colleagues the same measure of support and backing from the legislative assembly and the people of the province of Alberta that I am to very gratefully acknowledge."

To launch a scheme for planting a greater area of rye with a view to giving the drought problem in south Alberta and southwestern Saskatchewan a solution was given at Wetaskiwin on Friday by the board of directors of the Rotary Credit Men's Association, the Rotary and Kiwanis clubs and the Canadian manufacturers.

## ROYAL MARKET NEWS

## TELEPHONE HINTS

When ordering over the Phone always give the Name first, then the Order.

It saves time, as the order clerk can anticipate your wants more quickly, and make suitable suggestions when he knows with whom he is speaking. Frequently customers phone an order in, in a hurry, and hang up the receiver, forgetting to give their name and address, and then await the order, only to be disappointed, as the order will miss the regular delivery, and necessitate a Special delivery which is expensive.

It sometimes happens in extreme cold or stormy weather that the delivery service gets demoralized, causing unavoidable delays. To meet the situation order a day ahead and keep enough on hand for emergency.

## MOULDED VEAL

4lbs Knuckle Veal Salt and Pepper Tablespoon Gelatine Small Sliced Onion Nutmeg

Wash the meat, put in kettle with the onion, salt, simmer until meat is tender. Remove the meat and put through the chopper. Reduce the meat liquor to 1 1/2 cups, season. Soak the gelatine in cold water, and dissolve in the hot stock. Do not boil. Pour over the chopped meat and set aside to cool.

The gelatine may be omitted, but the meat cuts better if a little is added. If you want to add a little extra touch to the dish, boil an egg hard, cut the white parts in strips lengthwise of the egg; place these in the bottom of the mould in the shape of Water Lily petals. Crumb the yoke to make a yellow center. Place the meat gently on this and add the liquid. When the meat is turned from the mould the egg will form a garnish for the top.

HARDWARE MERCHANTS

TWO ESKIMO  
MURDERERS  
AID POLICE IN  
THE FAR NORTH

Edmonton, Aug. 15.—In May, 1918, Corporal Cornelius, of the R.N.W.M.P., left Edmonton for Herschel Island. He departed quietly and without any flourish of trumpets. Last week he returned to civilization again for the first time, as silently as he had left it. Over six years of his life have been spent in the Arctic wilds, four of them in the company only of the two Eskimo murderers, sentenced in 1911, and freed by order of the government later.

Two years were passed at Fort McPherson, where the big supply of provisions and building material were disposed of. Comfortable winter quarters were established here, and patrols of the surrounding country were undertaken. The two Eskimo murderers, who were taken out by the corporal, and offered their freedom, were so much taken by the ways of the white man that they asked permission to enter the service of the police, and were engaged, much to their delight. They rendered great service as guides and interpreters, and the white man's law has never had a better advertisement in the Arctic circle than that given to it by these two men, tried, punished and released by its officials, as a warning to others.

In 1917, Corporal Cornelius was joined by Constable Brockie, and the two set out for Herschel Island, where they spent two years, with many problems to the far corners of the uncharted wilds.

The final trip was taken by Constable Brockie via Bear Lake to Fort Norman, where the river to Fort McPherson, then north to the post on Herschel Island, back by coast to Constable Brockie once more, another return trip via Herschel, and through 1,400 ft. Fort McPherson up the Mackenzie River home by the summer steamboat. This latter trip was taken by dog sleighs, a distance of 1,100 miles being covered in this manner, and the total patrols by dog sled last winter ran around 2500 miles.

New headquarters were made at Fort Epworth, the patrol, accompanied by Staff Sergeant Clay, establishing this post, the two Eskimos, accompanying them. The party lived in snow huts for the greater part of the time and subsisted on the simple diets of the wilds, sked out by such rations as they were able to carry on their sleds. They built a wooden hut at Fort Epworth, however, and enjoyed a mild taste of civilization. In 1918, two other Eskimo murderers were brought in by the coast route by Sergeant Conway. These two men had been tried by Inspector Phillips for the murder of an Eskimo woman, whom both of them claimed as wife. They were, however, acquitted, owing to lack of evidence, and Clay, Brockie and Cornelius took them back to Constable Brockie where they were allowed to re-enter their trilles.

Corporal Cornelius says that the trial of the four Eskimos has had an excellent effect on the general conduct of the tribes as a whole, while the conduct of the four principals has been most exemplary. Despite their years of isolation and hardship, both Corporal Cornelius and Constable Brockie are looking forward to a return to the wilds in the near future. The two men will now enjoy a well earned holiday.

DENTIST WANTED  
ON DEATH CHARGE  
FOUND IN SOUTH

Arrested at a farm south of Calgary in the guise of a farm laborer, Dr. Brumfield, wanted in Roseburg, Ore., on the charge of having murdered a man, is in the custody of the Calgary police. He was placed under arrest by Detective Inspector Richardson, of the Calgary police and Detective Vaughn of the Royal Canadian Mounted Police.

Brumfield was working under the name of Norman Whitney. First traces of his whereabouts was obtained by the mounted police, in response to a wire to the city police from Portland saying that an express package had been sent from Lake Louise, Alberta, to Mrs. Norman Whitney, Roseburg, Oregon, and that the police suspected that the sender was Dr. Brumfield, who was wanted for murder.

The mounted police picked up the trail at Banff, and followed it to Calgary, thence to a farm 30 miles south of here, where Brumfield had taken a job as a farm laborer. He was arrested at noon today just as he returned from the field where he had been plowing all morning. When arrested as Dr. Brumfield, he turned white, and allowed the handcuffs to be put on him. "I have no statement to make," he said then to the officers. Later in the police cells, Whitney admitted to the real name of Dr. Brumfield.

## TOWN TOPICS

N. Begun took a business trip to Edmonton on Wednesday.

Miss E. Olson has accepted a situation in the Priard Hotel dining room.

Mrs. Brown, of Edmonton was a guest at the home of Mr. and Mrs. Jas. Waring this week.

Miss Sarah Burger has returned from the coast where she spent some time with friends.

Miss Florence Kelley came down from Edmonton on Tuesday evening, and is visiting at the home of Mrs. Geo. Baylis.

"If you want the best in Children's Photos, try Brown's Studio, 21 Lonsdale street."

Carl Berry had the misfortune to have his leg broken a few days ago. When he was kicked by a horse.

Mr. and Mrs. A. H. Livenshage and daughters, returned on Saturday from a trip to Vancouver.

Miss Cummings, of Wetaskiwin has been engaged as teacher for the Cherry Grove school for the coming term.

The Boy Scouts of Lammell Church who were camping out at Pigeon Lake for ten days, returned to the city on Sunday evening.

Hugh Wilson, who went to Calgary a few days ago to look into a business proposition, returned to Wetaskiwin the fore part of the week.

Chief of Police Marshall, who has been suffering for a few days with an attack of quinsy, is recovering nicely, and will soon be on duty again.

Pat Donnelly and family from Rimby, have moved to Wetaskiwin, and are occupying a home on Rossmore St.

Mrs. Jack Norford and two children returned a few days ago from Washington, where they spent about four months.

Miss Elsie Reiden and Dr. and Mrs. Conn of Edmonton were called to Campbellford, Ontario, last week on account of the death of their mother.

Mrs. B. Grein had as her guests a few days ago, Mrs. Kremer and Mrs. Loesch and daughter Caroling from Minnesota. They left last week to visit friends at Strono.

Mr. and Mrs. Torgerson and family arrived a few days ago from Vancouver to take up their residence in the city. Mr. Torgerson will have charge of the Alberta Pacific Elevator here.

R. M. Angus and family, who have been spending the summer at their cottage at Pigeon Lake, expect to return to the city the first part of the week.

W. J. Loggie, who has been spending his holidays renewing acquaintances at his old home in New Brunswick, returned home this week.

Mrs. Williamson and daughter, who have been on a trip to the coast, arrived in the city on Tuesday evening, and will spend some time at the home of the former's son, T. E. Williamson.

Rev. Mr. James left for his former home in England on Monday morning, being summoned on account of the serious illness of his father. He expects to return in about six weeks.

Mr. George Carpenter of Spokane, Wash., an oldtimer in the Hamilton district, has been renewing acquaintances in the city and country this week.

Mrs. Wm. Angus, of Melville, Nat, and her sister, Miss Murphy, of San Francisco, who have been spending some time at Pigeon Lake, the guests of Mr. and Mrs. R. M. Angus, left for the Nat on Tuesday morning.

Pigeon Lake is a very popular resort for the citizens of Wetaskiwin this year, as many of them spend the week-ends and Saturdays there. A number of new cottages have been built this summer.

Mr. and Mrs. Johnnie McKinnon, who have been visiting at the home of the latter's parents, Mr. and Mrs. P. S. Wilson, and with other friends in the city, left for their home at the coast on Monday.

Rev. Mr. Dewey and his wife, of Tillsonburg, Ont., who is a cousin of Mrs. Ernest Switzer, were guests this week at Mrs. Switzer's. They are spending two months through the west and at the coast.

## Card of Thanks

Mr. and Mrs. Otto Alberg and family wish through the columns of "The Times" to sincerely thank the neighbors and many kind friends for their expressions of sympathy and for the assistance rendered during their recent bereavement. They desire to especially express their appreciation of the many beautiful floral tributes.

In the local school some time ago the question was asked: "Name three kinds of destructive birds in the province of Alberta?" One brilliant student handed in the following answer: "The blackbird, the crow and the stork."
